TechNova Solutions — Company Knowledge Base

Company Overview

TechNova Solutions is a mid-sized software company founded in 2015, headquartered in Austin, Texas. The company specializes in cloud infrastructure, enterprise SaaS products, and AI-powered analytics platforms. TechNova currently employs around 850 people across offices in Austin, New York, London, and Bangalore.

The company's mission is to empower businesses with intelligent technology that scales. TechNova serves over 1,200 enterprise clients globally, including Fortune 500 companies in the finance, healthcare, and retail sectors.

Products

1. NovaCloud Platform

NovaCloud is TechNova's flagship cloud infrastructure product. It allows enterprises to deploy, monitor, and scale their applications across multi-cloud environments. Key features include auto-scaling, real-time cost optimization, and a unified dashboard for AWS, Azure, and GCP workloads. Pricing starts at \$499/month for the Starter tier and goes up to \$4,999/month for Enterprise tier.

2. NovaAnalytics

NovaAnalytics is an AI-powered business intelligence tool that connects to existing data warehouses and generates automated insights. It supports integrations with Snowflake, BigQuery, Redshift, and PostgreSQL. The tool uses natural language queries, meaning business users can ask questions like "What were our top 5 revenue regions last quarter?" without writing SQL. Pricing is usage-based, starting at \$0.10 per query.

3. NovaDesk

NovaDesk is TechNova's internal IT helpdesk and ticketing system, also sold as a SaaS product to external clients. It supports ticket routing, SLA tracking, automated escalation, and integrations with Slack and Microsoft Teams. NovaDesk has a free tier for teams up to 10 users, and paid plans starting at \$29/user/month.

HR Policies

Working Hours

TechNova operates on a flexible working model. Core hours are 10:00 AM to 3:00 PM in the employee's local timezone. Outside of core hours, employees are free to structure their own schedule as long as deliverables are met.

Leave Policy

- Annual Leave: 20 days per year for all full-time employees
- Sick Leave: 10 days per year, no questions asked
- Parental Leave: 16 weeks fully paid for primary caregivers, 8 weeks for secondary caregivers
- Public Holidays: Employees follow the public holiday calendar of their country of employment

Remote Work

TechNova is a remote-first company. Employees are not required to come into the office unless their role specifically requires it. Office spaces in all four cities are available as co-working spaces for those who prefer in-person work.

Performance Reviews

Performance reviews are conducted twice a year — in June and December. Employees are assessed on a 5-point scale across four dimensions: delivery, collaboration, innovation, and growth mindset. Ratings of 4 or above are eligible for a performance bonus.

Engineering Team Structure

The engineering department is led by CTO Sarah Kimura. It is divided into five squads:

- **Squad Alpha** — Owns the NovaCloud Platform core infrastructure
- **Squad Beta** — Owns NovaAnalytics data pipelines and ML models
- **Squad Gamma** — Owns NovaDesk backend and integrations
- **Squad Delta** — Owns frontend and design systems across all products
- **Squad Epsilon** — Owns DevOps, CI/CD pipelines, and internal tooling

Each squad has a Squad Lead, two to four senior engineers, and two to three mid-level engineers. Squads operate in two-week sprints and follow an async-first communication style.

Support and SLAs

TechNova offers three support tiers to its customers:

Tier	Response Time	Availability	Price
Basic	48 hours	Business hours only	Included in all plans
Pro	8 hours	Mon–Sat, 8AM–8PM	\$299/month
Enterprise	1 hour	24/7	\$999/month

All critical production outages are escalated to the on-call engineering team regardless of support tier.
